AUDIT PROFILE
partial_access

OVERALL PICTURE

Executive Summary

The website has a clear audit offer and a strong technical foundation. The main opportunity is to explain value, proof points and the next step more clearly.

Strengths

- The website has strong technical SEO and very good baseline technical scores.
- The offer is concrete and supported by clearly named products, services or content themes.
- Accessibility is above average according to Lighthouse.
- Basic indexing signals are present.

Main risks

- Some offer, content or audience layers may blend together.

NEXT STEPS

Top priorities

Priority recommendations

01 Clarify main services, content layers and target groups Area: Communication Impact: medium	02 Rewrite the main blocks so visitors quickly understand the primary offer and next step Area: Trust / proof Impact: medium	03 Separate audience paths and use cases. Area: Content structure Impact: medium
--	---	---

Technical performance and Lighthouse

Overview of performance, SEO, indexing and basic technical health of the website.

CLIENT
sigel-industries.com
WEBSITE
sigel-industries.com

TECHNICAL HEALTH

Basic website signals

Technical conclusion

The technical foundation is generally strong. Further work should focus mainly on content, UX details and next-step clarity.

SECTION 3

Indexing, navigation and links

Overview of discoverability, link health, CTA elements and basic navigation usability.

CLIENT

sigel-industries.com

SCOPE

10 / 20 pages

ROBOTS.TXT

found

The website does not block basic search engine access.

SITEMAP.XML

found

Search engines have a map of important URLs available.

CRAWL MODE

normal

The audit checked 10 pages from the planned scope of 20.

RELIABILITY

medium

Rendered check: no.

LINKS

LINKS

Broken links

No broken links were detected within the tested scope.

CTA

CTA to verify

11 CTA elements were identified for manual verification.

AVAILABILITY

Audit mode

The audit ran in partial_access mode; results should be read in this context.

RECOMMENDATIONS

What follows from this section

01

Manually verify CTA elements controlled by JavaScript or without a standard link or form action.

02

Keep the sitemap and robots.txt as a functional indexing baseline.

UX, viewport and communication

How the website feels to the user: mobile usability, offer clarity, CTA and content orientation.

CLIENT

sigel-industries.com

PRIMARY AREA

UX / communication

66

Communication clarity

Whether a visitor quickly understands what the website offers, who it is for, what they get and what the next step is.

90

Offer consistency

Whether hero copy, product blocks, CTAs, segments and explanations point to the same commercial story.

87

Offer specificity

How many concrete services, outputs, products, segments, use cases and proof points the website names.

86

Communication genericity

Whether communication is grounded in concrete things or empty generic marketing phrases. Lower genericity is better.

RESPONSIVENESS

MANUAL CHECK

Viewport / mobile behavior

DESKTOP

100/100

No confirmed horizontal overflow.

VS

VIEWPORT / MOBILE CHECK

88/100

No horizontal overflow was confirmed. 2 clickable elements are marked for manual mobile review: Archetypes, Roadmap.

Mobile finding

No horizontal overflow was confirmed. 2 clickable elements are marked for manual mobile review: Archetypes, Roadmap.

RISK LIGHT

UX risk areas

Mobile view

low

No horizontal overflow was confirmed. 2 clickable elements are marked for manual mobile review: Archetypes, Roadmap.

CTA elements

lower

11 CTA elements need manual verification, mainly because they use JavaScript/modal or form actions, not because they are confirmed broken.

Opening message / hero

low

The H1 is structurally fine; the important part is whether the hero claim and first paragraph quickly explain the output and next step.

Offer clarity

medium

The user needs to quickly understand what the audit checks, what they receive and what to do next.

NAVIGATION

Orientation and CTA

NAVIGATION TYPE

hybrid navigation

CTA ELEMENTS

14

CTA TO VERIFY

11

H1 / hero structure OK

The H1 is structurally fine; the important part is whether the hero claim and first paragraph quickly explain value, output and next step.

POSSIBLE IMPACT

Conversion impact

MEDIUM

Indicative business impact based on broken-link, CTA and viewport findings.

Mobile check

lower

CTA to verify

lower

Offer clarity

medium

Opening message

low

What the website communicates well

- The website has an identifiable and concrete offer.
- The basic purpose of the website is understandable.

What is unclear

- Some offer layers need clearer explanation.
- The user's next step should be more visible.

Recommended improvement

- Name the main offer and target segments more clearly.
- Make the primary CTA and practical benefit more visible.

Content and offer communication

Strategic understanding of the website: what it actually offers, who it serves and how clearly it communicates value.

WEBSITE TYPE

website audit and analytics tool

UNDERSTANDING CONFIDENCE

high

WEBSITE IDENTITY

website audit and analytics tool

automated website diagnostics with a client-ready PDF output

MAIN OFFER

a website audit with a visual PDF report combining technical health, SEO, UX, offer communication, brand archetype and a prioritized roadmap

DOMINANT PURPOSE

generate leads and guide users to a commercial next step

BUSINESS MODEL

service or software model

OFFER VS. COMMUNICATION

Alignment: high

89

The website has a clear audit offer and a strong technical foundation. The main opportunity is to explain value, proof points and the next step more clearly.

WHAT THE WEBSITE ACTUALLY DOES

a website audit with a visual PDF report combining technical health, SEO, UX, offer communication, brand archetype and a prioritized roadmap

WHAT IT EXPLICITLY COMMUNICATES

a website audit with a visual PDF report combining technical health, SEO, UX, offer communication, brand archetype and a prioritized roadmap

Products and services

website audit visual PDF report

Secondary offers

demo report

pilot agency cooperation

white-label input by agreement

Main topics

offer communication

brand archetype priority roadmap

Target segments

companies before marketing spend

agencies teams before redesign

COMMUNICATION SCORE

Readability and offer clarity

strategic interpretation

COMMUNICATION CLARITY

66

medium

What it measures:Whether a visitor quickly understands what the website offers, who it is for, what they get and what the next step is. Shows how quickly the visitor understands the value and next step.

OFFER CONSISTENCY

90

strong

What it measures:Whether hero copy, product blocks, CTAs, segments and explanations point to the same commercial story. Shows whether the website sections point toward the same purpose.

OFFER SPECIFICITY

87

strong

What it measures:How many concrete services, outputs, products, segments, use cases and proof points the website names. Shows how concrete the offer, topics and proof points are.

COMMUNICATION GENERICITY

86

strong

What it measures:Whether communication is grounded in concrete things or empty generic marketing phrases. Lower genericity is better. Lower genericity means fewer empty phrases and more concrete content.

WEAK SPOTS

What may slow value understanding

- The offer is concrete, but its individual layers, services or target groups should be separated more clearly.
- The main communication priority can blend with supporting content and broader information sections.

RECOMMENDATIONS

How to sharpen the offer

- Clarify main services, content layers and target groups.
- Rewrite the main blocks so visitors quickly understand the primary offer and next step.

Strategic conclusion

The website has a clear audit offer and a strong technical foundation. The main opportunity is to explain value, proof points and the next step more clearly.

Brand and audience archetypes

Strategic profile of how the website communicates outwardly and which customer types it naturally attracts.

PRIMARY ARCHETYPE

Sage

CONFIDENCE

high

PRIMARY BRAND ARCHETYPE

Sage

Sage is the core expertise layer: it grounds the audit in method, proof, explanation and the ability to turn a website into a clear decision.

STRATEGIC FIT

94

INTERPRETATION

What it means

The website communicates expertise, method, proof and the ability to turn website signals into a clearer decision. This supports Sage as the dominant brand archetype.

Efficient pragmatist, Technocrat / analyst and Self-realizing creator are the most relevant audience layers here. Use them as communication lenses, not as a psychological label.

BRAND LAYER

BRAND

Company archetypes

Sage

94

Sage is the core expertise layer: it grounds the audit in method, proof, explanation and the ability to turn a website into a clear decision.

Magician

93

Magician is the transformation layer: it turns an unclear website, scattered signals and uncertainty into a readable report, roadmap and concrete process.

Ruler

83

Ruler is the secondary layer of order: it shows priority, decision structure, risk control and a clear plan of next steps.

AUDIENCE

CUSTOMER

Consumer archetypes

Efficient pragmatist

94

Needs to quickly understand the practical value, effort, next step and concrete outcome.
Name what the audit solves and what the user receives.; Highlight the report sample, price, timing and clear CTA.

Technocrat / analyst

94

Needs precise information, proof, structure, a transparent process and a way to verify claims.

Self-realizing creator

64

Needs to quickly understand the value, proof and next step.

The next page shows how the brand archetype connects with audience types and where the strongest strategic fit emerges.

Archetype relationship map

Connection between the brand archetype and customer motivations. The map works as a communication compass, not decoration.

DOMINANT DIRECTION
Sage
PRIMARY AUDIENCE
Efficient pragmatist

CONNECTION

Brand archetype → customer archetype

strategic fit

Strategic note

These pairings show which arguments the report should use. This is not a psychological test of the audience, but a communication frame for proof, value and next step.

Archetype playbook

Deeper explanation of the resulting archetypes: how to turn them into communication tone, content, arguments and business decisions.

MAIN DIRECTION
Sage
PRIMARY AUDIENCE
Efficient pragmatist

EXPLANATION

What this section does

Archetypes are not used here as decoration, but as a practical communication tool. They help define the tone the brand should use, which arguments to emphasize and what may feel weaker to the audience.

USE

Where it shows up

The results can be used for homepage, CTA, landing pages, articles, sales arguments, visual tone and overall brand positioning.

BRAND PLAYBOOK

How the brand should feel

company layer

PRIMARY DIRECTION
Sage

94

Sage is the core expertise layer: it grounds the audit in method, proof, explanation and the ability to turn a website into a clear decision.

How it should show up

- show the methodology, data sources and audit limits
- support claims with proof, examples and concrete findings
- explain why the recommendation matters and what it should change

expert

clear

credible

What to watch out for

- sounding academic without a decision
- hiding value behind methodology

SECONDARY LAYER
Magician

93

Magician is the transformation layer: it turns an unclear website, scattered signals and uncertainty into a readable report, roadmap and concrete process.

How it should show up

- show the shift from website chaos to a clear roadmap
- connect technical, UX and communication findings into one decision
- show before/after logic: what slows performance now and what changes

transformational

practical

clear

What to watch out for

- promising a magical fix without proof
- looking impressive without a concrete output

SECONDARY LAYER
Ruler

83

Ruler is the secondary layer of order: it shows priority, decision structure, risk control and a clear plan of next steps.

How it should show up

- show the report structure and finding priority
- explain the evaluation rules and score meaning
- give the user a decision framework, not just a list of problems

authoritative

structured

reliable

What to watch out for

- opaque scoring without explanation
- confusing authority with hard selling

How to address the audience

customer layer

PRIMARY AUDIENCE

Efficient pragmatist

94

Needs to quickly understand the practical value, effort, next step and concrete outcome.

How to address them

- Name what the audit solves and what the user receives.
- Highlight the report sample, price, timing and clear CTA.

Decision triggers

outcome time next step

What to avoid

- overexplaining without a decision
- unclear CTA

SECONDARY AUDIENCE

Technocrat / analyst

94

Needs precise information, proof, structure, a transparent process and a way to verify claims.

How to address them

- Show the methodology, scores, data sources and audit limits.
- Use concrete proof, not generic promises.

Decision triggers

proof method detail

What to avoid

- unverifiable claims
- unclear scores without explanation

SECONDARY AUDIENCE

Self-realizing creator

64

Needs to quickly understand the value, proof and next step.

How to address them

- Communicate concrete value, proof and a clear next step.
- Use simple structure and concrete arguments.

Decision triggers

value trust next step

What to avoid

- content without a next step
- generic education without output

Practical communication rules

tone of voice

How to speak

- speak concretely, credibly and without empty marketing phrases
- connect the website value to real user situations
- explain the next step simply and without unnecessary friction

What to emphasize

- a website audit with a visual PDF report combining technical health, SEO, UX, offer communication, brand archetype and a prioritized roadmap
- a clear report sample, method, limits and example findings
- concrete value for the user: what the audit checks, what they receive and what next step follows

What to avoid

- generic promises without proof
- unclear CTA
- an archetype tone disconnected from the real offer

CONTENT DIRECTION

Which content supports the archetype strategy

01

use cases

pre-redesign, pre-campaign and weak-lead scenarios

02

report proof

sample report, method, limits, data sources

03

onboarding content

what the audit contains, what the client receives and the next step

decision-making

OVERALL PICTURE

Website status in one sentence

The website has a clear audit offer and a strong technical foundation. The main opportunity is to explain value, proof points and the next step more clearly.

AREA SCORES

Performance profile

Technical		100
SEO		100
UX		94
Communication		89
Strategy		91

KEY FINDINGS

What matters most

management overview

● Technical foundation is strong

SEO, performance and baseline technical signals look very strong; the main work is not speed, but value clarity and proof.

● The offer is concrete but layered

The audit combines technical health, SEO, UX, offer communication and archetypes; the first screen must quickly explain what the user receives.

● UX and CTA need verification

The UX score is mainly reduced by CTA and mobile elements requiring manual verification, not by broken links.

● Proof of value should be stronger

A report sample, method, example findings and a clear next step would strengthen trust before conversion.

STRENGTHS

What can be built on

- The website has strong technical SEO and very good baseline technical scores.
- The offer is concrete and supported by clearly named products, services or content themes.
- Accessibility is above average according to Lighthouse.
- Basic indexing signals are present.

RISKS

What may slow performance

- Some offer, content or audience layers may blend together.

BUSINESS IMPACT

Which areas matter most

impact view

COMMUNICATION

medium

The offer is concrete, but its individual layers, services or target groups should be separated more clearly.

TRUST / PROOF

medium

Rewrite the main blocks so visitors quickly understand the primary offer and next step.

CONTENT STRUCTURE

medium

The website has several layers; visitors need a clearer route for their situation.

RECOMMENDED FOCUS

Where to focus the next work

01

Clarify main services, content layers and target groups

02

Strengthen proof of value with a report sample, method and example findings

03

Separate paths for companies, agencies and redesign scenarios

Priorities and roadmap

Action plan: what to solve first, which changes have the biggest impact and how to split work by priority and effort.

SECTION TYPE

Action plan

PRIORITY COUNT

3

HIGHEST PRIORITY

Clarify main services, content layers and target groups

QUICK WIN

BIGGEST OPPORTUNITY

Separate audience paths and use cases.

TOP PRIORITIES

Prioritized sequence

01

Clarify main services, content layers and target groups

30 days

Communication Impact: medium Effort: medium

The offer is concrete, but its individual layers, services or target groups should be separated more clearly.

Rewrite the hero/intro block around offer, audience, output and next action.

02

Rewrite the main blocks so visitors quickly understand the primary offer and next step

30 days

Trust / proof Impact: medium Effort: medium

The main communication priority can blend with supporting content and broader information sections.

Add a sample output, method summary and example decision scenario.

03

Separate audience paths and use cases.

30 days

Content structure Impact: medium Effort: medium

The website has several layers; visitors need a clearer route for their situation.

Create clearer entry points for the main audience segments or use cases.

DECISION VIEW

Impact / effort

How to read the matrix

The best candidates are items with high impact and low or medium effort. They should go into the first work block.

ROADMAP

Short-term / mid-term / strategic plan

work plan

30 days

Offer clarity

- Rewrite the hero/intro block around offer, audience, output and next action.

60 days

Proof and segments

- Add a sample output, method summary and example decision scenario.
- Create clearer entry points for the main audience segments or use cases.

90 days

Business use

- Connect content with a measurable business goal.

Quick wins

- Rewrite the hero/intro block around offer, audience, output and next action.
- Add a sample output, method summary and example decision scenario.

Mid-term steps

- Create clearer entry points for the main audience segments or use cases.

Strategic steps

- Connect content with a measurable business goal.
